Re: Filing of Invention Documents with Disclosure Document Program

Invention: Training Golf Club

Dear Commissioner for Patents:

Please find enclosed invention documents for Mr. Trent Galloway's invention entitled Training Golf Club. Please file the enclosed invention documents under the Disclosure Document Program. The required \$10 fee from the inventor is enclosed.

If you should have any questions, feel free to contact me anytime.

Sincerely,

Laura Deltener  
Law Office Assistant

Enclosures: As Stated

BEST AVAILABLE COPY

**1. Describe The "Purpose" Of Your Idea**

To help golfers refine their golf swing by improving their mechanics and swing tempo, which creates consistent golf ball striking.

**2. Describe The "Physical Structure" Of Your Idea (if applicable)**

It appears to be a typical golf club, however, weight has been strategically added throughout the club.

**3. Describe How Your Idea "Operates/Functions"**

The weight that has been added, prevents the golfer from over-swinging the club, which creates a balanced and consistent golf swing.

**4. Describe The "Unique Features" Of Your Idea**

This unique club allows the golfer to train his swing not only on the golf range, but also on the golf course. Unlike most swing trainers, it gives the player instant feedback. The golf club is made with a flexible shaft, heavy club head and weight distributed within the shaft. When all these components are combined, it creates a club that produces a better golf swing. This in turn gives the golfer better contact with the golf ball, higher ball flight and straighter golf shots. Occasional use of this club improves the golfers overall swing mechanics, which makes for a more consistent golf game.

Ⓢ This is what the original patent attorney  
uses to run the patent search.

## ADDITIONAL INFORMATION

### 1. What Problems Does Your Idea Solve?

The notion that the faster or harder a golfer swings, the farther the golf ball will go is untrue. This training golf club helps any golfer with their take-away, down swing and follow-through, which promotes a smooth and fluid tempo from start to finish.

### 2. What Benefits Would A User Receive?

The golfer will see immediate results on how timing and tempo are the foundation of a good golf swing. These results can be carried over to their actual playing clubs.

### 3. What Groups Of People Would Use Your Idea?

Any golfer at any skill level could benefit from this golf club.

### 4. How Is Your Idea Different From Similar Products On The Market?

For the purposes of practicing without golf balls, with golf balls on the golf range or playing on the golf course, this golf club is made to swing anywhere.
